Quantum Lending Solutions is the API-first, modular lending infrastructure platform purpose-built for financial institutions that need to launch, manage, and scale SMB lending programs, without building the infrastructure themselves. QLS delivers the complete lending stack: origination, underwriting, compliance, servicing, and portfolio management, as modular, API-first infrastructure that deploys in 45–90 days. QLS serves community banks, credit unions, fintech originators, non-bank lenders, and CDFIs.
